- Line-in to directly record external sources as MP3
- Up to 14 hours of playback time with the integrated li-poly battery
- Easiest operation and featherweight – ideal for sports and people on the go

T20

Small, practical MP3 player in USB-stick format with an elegant metal casing. Terrific sound at an affordable price.

The new T20 series from iriver is bound to make a great impression with the tiniest proportions on the outside and high-powered technology on the inside. The USB-stick design of the T20 lets you hook it straight up to the PC without any annoying cables. Thanks to USB 2.0, you can download your music files in lightning speed from your PC to the player and this even recharges the powerful battery to provide you with 14 hours of dynamic sound and perfect entertainment wherever you might be. Its elegant metal casing is ample protection against awkward bumps and the compact format slips easily into virtually any pocket. Memory capacity ranges from 512 MB to 1 GB and the largest version is able to accommodate more than 250 songs in MP3 format or 500 in WMA or OGG Vorbis formats. A line-in enables direct recording in MP3 format and the built-in microphone lets you record memos and notes. Thanks to Windows Media 10 DRM support, the T20 is also well equipped to handle all the popular music download services, both now and in the future.

iriver

Available models:
